Crafts

by Cosy & Trendy

Happiness lies in the little things. A beautiful cup or a plate crafted with love, for example.

Knives that the owner of a knife store designed for himself. Or the perfect set of glasses.

Beautiful objects with a story create atmosphere and cosiness and infuse your home with a personal and unique touch. We often fail to realise that every object we use was once designed and made with passion and dedication. Nowhere is that dedication and craftsmanship more tangible than with artisan products, where each piece is made with an eye for detail, with a steady and practiced hand and with love for the craft. With the Crafts series, Cosy & Trendy wants to give some of these artisans the attention they deserve. We share their story and give them the chance to spread their products, which they have worked so hard on, more widely.

Why?

At Crafts, we believe that handcrafted products are not only beautiful, but also express a sense of personality and quality. That's why we focus on an intense collaboration with artisan creatives. They bring the artistic concepts, we bring the experience in production, marketing and distribution.

Crafts specialises in producing handcrafted products on a larger scale. We want to make the unique feel of handmade objects accessible to everyone who loves conviviality.

Whether it is hand-turned ceramics, sturdy leather aprons, beautiful knives or original blown glass, Crafts offers makers a platform to translate their style and vision of hand-crafted creativity into affordable products. With our resources in production, marketing and distribution, we give them the opportunity to manufacture their products on a large scale.

We select our partners for production very consciously. Wherever possible, we opt for production in Europe to limit the ecological footprint. We also pay a lot of attention to using responsible materials. This allows us to guarantee that our products are both beautiful and sustainable.

Meet the makers

Charlotte Lannoy

Charlotte was in front of a classroom for many years, but followed her husband and swapped kindergarten for an office job. Before long, she missed her creative outlet and enrolled in a pottery course.

You can't just put a label on Charlotte's ceramics. She loves different colours, shapes and styles and likes to experiment with new trends. In her studio, she combines clean lines in the pottery with nuances in the glaze. Despite the different shapes, sizes and finishes, her style is still easily recognisable. Often inspired by nature, the objects are stylised, organic in form and functional. With their pure forms, striking structures and cheerful colours, they bring a warm cosiness to any interior.

Spots & Speckles

Spots&Speckles is the story of Maryline and Jolien. In their studio in Antwerp, mother and daughter put their hands to clay together to celebrate the beauty of slow, conscious living. With hand-shaped plates, bowls and cups, they create unique objects that transform your home into a place where you can relax and be yourself.

A cheerful espresso cup, a striking tapas bowl or a beautiful plate add character to your interior and invite you to reflect on the beautiful things around you.

Organic shapes and a beautiful finish with cheerful glaze shades give this collection an artisanal feel that radiates cosiness and joie de vivre.

Couteaux & Co

Having always dreamed of working with knives, Pascal Vervaeke left his job as a travelling representative to become the owner of the legendary Belgian sharpening workshop and knife store Couteaux&Co.

According to Pascal, everyone deserves the pleasure of a good knife. So he bundled his years of expertise and passion into a series of top-quality knives for everyday use. Made just like he would want them for himself, with a European shape and a nod to traditional Japanese design. Crafted from fully forged German steel for top performance and long-lasting sharpness, with a well-balanced walnut handle that ensures easy handling.
